Efficient machine and facility operation calls for fail-safe and maintenance-friendly control voltage distribution that can be installed in a time and space-saving manner.

With the new maxGUARD system, the terminal blocks (previously installed separately) for distributing potential to the outputs of the electronic load monitors become an integral part of a 24 V DC control voltage distribution system.

The innovative combination of load monitoring and potential distribution saves time during installation, increases safety against failure and reduces the amount of space required on the terminal rail by 50%.

**General ordering data**

| Version    | Partition plate            |
|------------|----------------------------|
| Order No.  | <a href="#">2500760000</a> |
| Type       | AMG EP KIT                 |
| GTIN (EAN) | 4050118525465              |
| Qty.       | 1 pc(s).                   |
