PROCON-WEB Embedded System is available platform independent via container image, Linux or Windows.

To implement the optimal web-based HMI solution, PROCON-WEB Embedded System offers the following features:

- Roles and rights based user management
- Extensive alarming
- predefined controls, such as buttons, sliders, text fields or image areas
- powerful more complex controls, like iframes, charts, tables
- flexible scripting for maximum flexibility
- Historian functionality for storing and visualizing historical data
- connection to various control systems via extensive communication driver portfolio (OPC-UA, CODESYS driver or via Modbus)

General ordering data

| | |
|-----------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Version | Visualization software, Platform for runtime system: Linux, Windows 10, Windows 11, Docker, Number of process variables, max.: 2000, Number of HMI-devices, max.: 10 |
| Order No. | 2992860000 |
| Type | PWEB-ES-RT-2000/10 |
| Qty. | 1 pc(s). |
